

DEADHEAD LUMBER COMPANY

PERFECTLY PRESERVED

RECLAIMING SUNKEN LOGS  
FROM MAINE LAKES & RIVERS

## Custom Wide Plank Hardwood Flooring

Honoring our lumber's rich history, we work closely with architects, builders, designers and homeowners to complete their custom projects with our hand-picked, wide-plank flooring.

Despite the myriad of flooring choices available today from any big box store, it is extremely difficult to find a truly ecologically-friendly product. There is peace of mind in knowing your floor wasn't cut from a rainforest or mass-produced in an overseas factory. DeadHead wide plank floors set our clientele apart—they are eco-friendly, unique and rich in character.

### *A story behind every floor...*

Your floor took 300-500 years to grow, lay sunken in a lake to cure for 200 more, then was carefully reclaimed, slowly dried and custom fit to your home.

### **What else in your home took 700 years to make?**

Thickness:	¾"	Species:	Yellow Birch
Widths:	4" through 10" Fixed & Random Width		Select Red Birch Hard Maple
Lengths:	3' through 18'		Spruce
Profile:	NOFMA T&G or Shiplap		

Our lumber is slowly Air Dried to 16%-20% moisture content, then Kiln Dried to 6%-8% MC before milling.
